

NOTE: Adult supervision is recommended

Make your own Pinwheel!

1. Cut out blue square and along dashed lines.

2. Bend into the center every other point and stick a pushpin through all four points.

3. Spin the pushpin around a few times to make a hole a little bigger so your pinwheel spins easily.

4. Stick the pushpin into a pencil. It might help to separate your pinwheel from the pencil with a bead for super spinning!
